

# Common Human Resource Information Standards

## Person Security Clearance Status

---

Person Security Clearance Status denotes whether a person's security clearance is active or not active.

### Permitted Values

Security Clearance is Active  
 Security Clearance is Not Active

### Structural Business Rules

A person with a security clearance in an inactive status may be reclassified or reassigned to a position that requires that person's current level of clearance. A person may not necessarily need to be reclassified if a clearance is withdrawn or downgraded, just reassigned to a different position.
