

Common Human Resource Information Standards

Member Body Fat Evaluation Result

Member Body Fat Evaluation Result is the outcome of a DoD Military Service member's body fat evaluation based on his/her height, weight, and circumference measurements.

Permitted Values

- Medically waived (temporary medical condition or pregnancy)
- Not within standards
- Within standards
- Failed to be weighed/measured when required

Structural Business Rules

A DoD Military Service member's Person Height, Person Weight and Member Body Fat Evaluation Result must have an associated Member Height/Weight/Body Fat Effective Date, when being recorded for physical readiness purposes.

A DoD Military Service member may have only one Member Body Fat Evaluation Result at a time.
